

### Data Management Leads

**Thomas Boesen**  
Laboratory Informatics,  
Scifeon

**Panthéa Tzourio**  
Clinical Informatics,  
Inserm Bordeaux

### Key WP8 Data Management Objectives

- Creating and maintaining CARE Data Management Plan, including submission to IMI
- Creating and maintaining data management software systems for laboratory and clinical data
- Support data dissemination according to IMI requirements. Balance intellectual property requirements of participants with IMI needs to share information

### CONNECTIONS

*with other work packages*

#### Work packages 2, 3

Small molecule laboratory data

#### Work packages 6 & 7

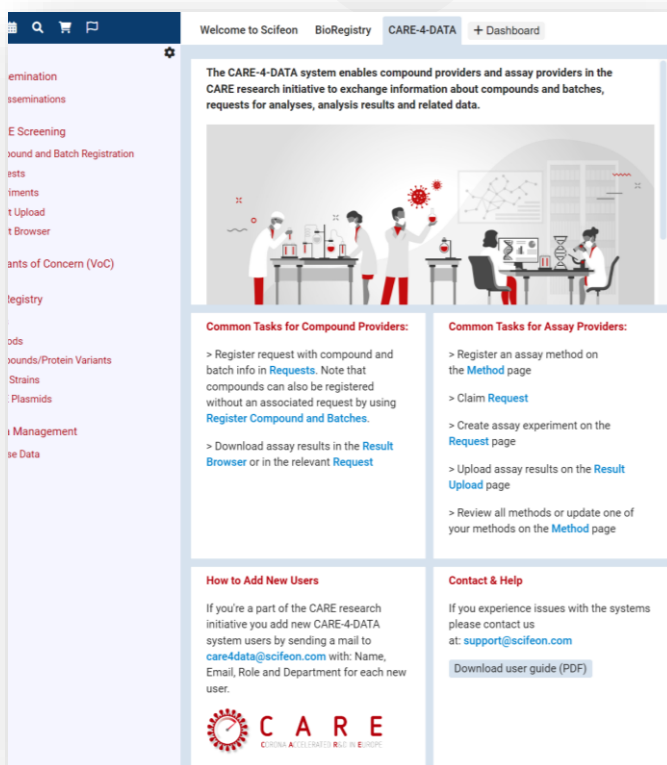

Clinical data

### Other WP8 Objectives

- Efficient coordination of consortium and project management
- Well-targeted ethics, communication, dissemination, exploitation efforts
- Creation of legal templates where agreed

## CARE-4-DATA platform

The screenshot shows the CARE-4-DATA platform dashboard. It includes a navigation menu on the left with categories like 'E Screening', 'Assays and Batch Registration', 'Assays', 'Assays Upload', 'Assays Browser', 'Assays of Concern (VoC)', 'Assays Registry', 'Assays Upload', 'Assays Protein Variants', 'Assays Strains', 'Assays Plasmids', 'Assays Management', and 'Assays Data'. The main content area is titled 'Welcome to Scifeon BioRegistry CARE-4-DATA + Dashboard'. It contains a description of the platform: 'The CARE-4-DATA system enables compound providers and assay providers in the CARE research initiative to exchange information about compounds and batches, requests for analyses, analysis results and related data.' Below this, there are two columns of 'Common Tasks' for Compound Providers and Assay Providers. The Compound Providers tasks include: 'Register request with compound and batch info in Requests. Note that compounds can also be registered without an associated request by using Register Compound and Batches.' and 'Download assay results in the Result Browser or in the relevant Request.' The Assay Providers tasks include: 'Register an assay method on the Method page', 'Claim Request', 'Create assay experiment on the Request page', 'Upload assay results on the Result Upload page', and 'Review all methods or update one of your methods on the Method page'. At the bottom, there are sections for 'How to Add New Users' and 'Contact & Help'. The CARE logo is visible at the bottom left of the dashboard.

## BREAKTHROUGH moments

**2021**

Scifeon and Inserm Bordeaux collaborated in the creation of a data management plan and submitted it to IMI

University of Bordeaux created a data management platform to handle clinical, virological and OMICS data

Scifeon released CARE-4-DATA, a laboratory informatics platform <https://care4data.scifeon.cloud/>

**2022**

Dissemination support in CARE-4-DATA

**2023**

Furthermore, we have created a mid-term update to the DMP

## PUBLIC DELIVERABLES

**D8.3 Initial Data Management Plan, May 2021**

**D8.13 Mid Data Management Plan, Jun 2024**

**D8.14 Final Data Management Plan, Mar 2025**

<https://care4data.scifeon.cloud/>
